PROFILE INFO

.I'm Jivitesh, a passionate and driven AI & Data Science Engineering student with a builder's mindset and a bias for innovation. I specialize in crafting scalable, automation-first solutions at the intersection of machine learning, web technologies, and real-world impact. With hands-on experience in full-stack development, cloud platforms, and push-notification systems, I thrive on transforming complex problems into clean, deployable products. I'm actively seeking opportunities to grow, collaborate, and build tech that matters — because I believe the future belongs to the ones who ship it.

EXPERIENCE & ACHIEVEMENTS

- Advanced in python projects
- Food order management
